The Total Sanding Concept

EKAFORCE

EKAFORCE is designed for sanding and polishing of metal and fiberglass with a special focus on Automotive Body Repair. Coated on a strong and flexible B-Weight paper backing, **EKAFORCE** can withstand severe applications while maintain the flexibility required for sanding of body profiles and other intricate areas.

EKAFORCE is coated with a durable Aluminum Oxide grain in an open configuration to prevent premature clogging and yield superior life. A special Anti-Clogging treatment helps to further reduce loading while offering a very uniform finish.

EKAFORCE is available in grits #80 through #600 and can be supplied as Discs, Sheet or Rolls.

Grain	Aluminum Oxide
Backing	B- Weight Latex paper
Bonding	Resin over Resin
Coating	Semi-Open
Application	Discs, Sheets, Rolls

Uneeda Enterprizes, Inc., established in 1967, has been built with a commitment to selling the highest quality products, providing unmatched customer service, technical support and the best overall value for every dollar spent.

Uneeda does not want to be just another abrasive supplier.

We strive to offer our customers **"The Total Sanding Concept"**.
